

# BOC Cylinder Trolleys

*Providing equipment solutions for our customers*

Handling and storing cylinders can be difficult due to their awkward shape, size and weight. They can be a threat to workers and their workplace if not secured correctly. Current legislation stipulates that cylinders be properly secured in transit and whilst stationary. Most BOC trolley designs free the operator to guide and push - not carry the load, and no lifting is required to load and unload the cylinders.

## Portapak Cylinder Trolley
