

Personal Oxygen Monitors & Room Monitors

Providing equipment solutions for our customers

QPM3200

Personal pocket sized oxygen deficiency monitor with LCD Display. Cannot be switched off and provides up to two years of continuous operation after which the sensor and battery can be replaced by returning to Gas Safe in the post. Annual servicing and calibration is available.

QFM330

Simple, easy to install, battery powered (two year life), modular wall mounted oxygen deficiency monitor. It continuously monitors the concentration of oxygen in the surrounding air and provides both visual and audible alarms when oxygen levels fall below pre-set levels.

QRD330

Single channel battery powered (two year) alarm repeater unit to be fitted outside the entrance door to the monitored room. The panel will repeat all the main monitor alarms and is fitted with an LCD display to show the actual oxygen level in the monitored room. Connects to the the QFM330 monitor via a single lead supplied.

Oxygen Monitoring Systems

A wide range of monitors designed for ease of installation and continuous monitoring even in the event of a mains failure. We offer a number of different repeater panels covering every scenario from single monitor to 64 channel requirements. We are able to offer a full design and installation service for every type of system. The system is modular in design to allow easy build up of different modules to suit every requirement. Systems can also be expanded on site retrospectively if requirements should change.
