

BOC Welding Goggles

Providing equipment solutions for our customers

uvex ultra-vision 9301

Features

- Sets a benchmark for comfort, field of vision and fit, even when prescription spectacles are worn
- Scratch-resistant coating minimises the damage of welding sparks
- Effective high-tech ventilation system
- Green infradur PLUS polycarbonate lenses comply with EN 169 welding filters and absorb the rays caused by gas welding processes: UV rays, IR rays as well as glare. They provide higher levels of mechanical protection than glass filters
- New to the UK, and exclusively from BOC Industrial, the ultra-vision 9301 welding goggles are now available with a revolutionary anti-mist coating

uvex 9350

Features

- Flip-up lens, easily replaceable
- Comfortable, compact welding goggle with a soft face lining
- Lightweight and robust design with large covered ventilation openings
- Green infradur PLUS lenses comply with EN 169 welding filters and absorb the rays caused by gas welding processes: UV rays, IR rays as well as glare. They provide higher levels of mechanical protection than glass filters

Ski-type

Features

- Lightweight and robust design
- Adjustable headband
- Green infradur PLUS lenses comply with EN 169 welding filters and absorb the rays caused by gas welding processes: UV rays, IR rays as well as glare. They provide higher levels of mechanical protection than glass filters
