

BOC Flowmeter

Providing equipment solutions for our customers

Precise and accurate, BOC flowmeters are specially designed to give true and easy-to-read measurements for expert MIG and TIG welding.

The BOC flowmeter is accurately designed to give a true, easy-to-read flow measurement for MIG or TIG welding. The BOC flowmeter is built to be a durable, long-lasting product, with a brass and shatter-resistant polycarbonate construction and a shock-absorption fitting to protect the flow tube from high-pressure surges. BOC flowmeters are compatible with, and sold separately from, the BOC Series 6000 Arc 2 TIG regulator. The BOC flowmeter is accurately designed to give a true, easy-to-read flow measurement for MIG or TIG welding. BOC Integrated Regulator Flowmeter

Providing equipment solutions for our customers

Precise and accurate, BOC flowmeters are specially designed to give true and easy-to-read measurements for expert MIG and TIG welding.

This precision BOC pre-set regulator flowmeter is suitable for critical applications, such as shielding gas control for MIG and TIG welding, where an accurate gas flow needs to be set and maintained. The integrated regulator flowmeter is a convenient one-piece regulator and dynamic flowmeter all in one. It is capable of delivering an adjustable flow from zero to 30 litres/minute.

Applications

- MIG/TIG welding applications where an extremely accurate indication of flow is required
- Packaging or blanketing applications where an accurate low flow of gas is needed
- Process control in the technical, food and pharmaceutical industries

Five-year Conditional Warranty

Part number	41565
Description	Integrated Regulator Flowmeter
Retail Price (inc VAT)	£107.35 (£91.36 ex vat)
