

BOC Hoses

Providing equipment solutions for our customers

BOC hoses are robust, general-purpose hoses manufactured with a three-layer construction for safety and longevity. The inner tube is constructed from black rubber. This is reinforced with layers of high-strength multi-spiral braid textile yarn, and covered with a smooth rubber outer layer that is weather and abrasion resistant.

BOC hoses offer unbeatable flexibility and kink resistance, and conform to EN 559.

Fuel gas and oxygen hoses are supplied with machine-swaged fittings and check valves approved by EN 730-2.

Oxygen hose

Acetylene hose

Inert hose

Propane hose
