

BOC Series 6000 Single-Stage Refrigeration Regulator

Providing equipment solutions for our customers

The new BOC RS600 high-pressure nitrogen regulator features safety gauges, rugged brass and chrome construction, and incorporates proven global regulator technology - the unique BOC encapsulated valve – providing superior performance and extended life. This, together with the heavy-duty construction, provides longer trouble-free operation - backed by BOC Industrial's exceptional five-year limited warranty.

The RS600 is specially designed to meet the specifications of HVAC refrigeration purge and leak-test applications. This regulator is designed for use with nitrogen to test HVAC systems to locate leaks and purge an area for installation and repair. Its compact size is suitable for use where space is limited. The regulator features a unique control knob for easy pressure adjustment.

The RS600 operates in a pressure range of up to 42 bar and its robust construction makes the regulator the ideal choice for the engineer on the move. The 7/16" JIC refrigeration outlet means that no adaptor is required to use the BOC RS600 with standard refrigeration equipment.

A lower-pressure version, capable of a 26-bar delivery pressure and with a 3/8" outlet connection, is also available.

Five-year Conditional Warranty

Part number	41559	41560
Description	Series 6000 S400 Refrigeration Regulator	Series 6000 RS600 Refrigeration Regulator
Gas Used	Nitrogen	Nitrogen
Delivery Pressure	0–390 psi 0–26 bar	0–600 psi 0–42 bar
Inlet Connection	BS341 no. 3 5/8" RH	BS341 no. 3 5/8" RH
Outlet Connection	3/8" RH	7/16" JIC
Max. Inlet Pressure	4500 psi 300 bar	4500 psi 300 bar
Retail Price (inc VAT)	£201.29 (£171.31 ex vat)	£201.29 (£171.31 ex vat)
