

BOC Series 9500 Multi-stage Regulator

Providing equipment solutions for our customers

BOC Series 9500 regulators are designed to give a constant, precise delivery of the required pressure of gas without the need for continuous readjustment. This is important in applications where an operator works at a distance from the regulator.

BOC Series 9500 multi-stage regulators are the product of choice for the professional, designed for optimum performance in welding, cutting and heating applications and for circumstances where exceptional safety is required. With its best-in-class flows and control, unique safety features and rugged heavy-duty design, the Series 9500 is well suited for use in tough industrial and corrosive environments.

The series comprises a full range of products designed specifically for use in applications using oxygen, acetylene, nitrogen, air, carbon dioxide and inert gases.

Multi-stage high-outlet-pressure regulators are suited to heavy-duty welding, cutting, gouging, super-heating and light lancing applications.

Features

- Superior flow characteristics - best in class for multi-stage industrial regulators
- Manufactured to BS EN ISO 2503 standards
- Gauges conform to BS EN 562 and ISO 5171
- Replacement date stamped on regulator

Part Number Series 9500	41570	41571	41572	41573	41574 (Inert)	41575 (Inert)	41576	41577	41578
Description	Oxygen 4 bar	Oxygen 10 bar	Carbon dioxide 10 bar	Acetylene 1.5 bar	Nitrogen/ Argon 4 bar	Nitrogen/ Argon 10 bar	Hydrogen 10 bar	Air 10 bar	Helium 10 bar
Gas Used	Oxygen	Oxygen	Carbon dioxide	Acetylene	Nitrogen/ Argon	Nitrogen/ Argon	Hydrogen	Air	Helium
Delivery Pressure	0-60 psi 0-4 bar	0-150 psi 0-10 bar	0-150 psi 0-10 bar	0-22 psi 0-1.5 bar	0-60 psi 0-4 bar	0-150 psi 0-10 bar	0-150 psi 0-10 bar	0-150 psi 0-10 bar	0-150 psi 0-10 bar
