

BOC Combi Cutting Attachment

Providing equipment solutions for our customers

The BOC Combi cutting attachment cuts up to 8" (200mm) steel and is designed for extra durability and safety. BOC cutting attachments feature nozzle mixing technology for added safety and for protecting the torch from accidental backfires.

It features silver-brazed joints, thick-walled stainless tubes, chrome plating for improved heat dissipation and a rugged head for an extended life in tough environments, resulting in reduced warping and reduced maintenance costs.

The BOC Combi cutting attachment can be used with either acetylene or propane, depending on the type of nozzle fitted. The robust, ergonomic design of the Combi makes it ideal for use in the fabrication, auto-shop, agriculture, shipbuilding and metalworking industries.

- Used in BOC ProMaster and BOC MasterStart outfits
- Made to EN ISO 5172
- Can be used with acetylene or propane

Compatible Parts:

- BOC Combi cutting nozzles
- BOC Combi shank

Five-year Conditional Warranty

Part number	41585
Description	BOC Combi Cutting Attachment Medium-duty
Length	250mm
Weight	580g
Retail Price (inc VAT)	£100.65 (£85.66 ex vat)

BOC Combi Shank

Providing equipment solutions for our customers

This rugged BOC Combi shank is designed for general-to-heavy-duty welding, brazing, heating and cutting with fuel gases. The ergonomic design of the heavy-duty cast handle gives the operator balance and improved grip.

The BOC Combi shank features easy-grip valves with drag adjustment, useful cutting data tables and staggered hose connections to keep hoses separate and to allow easy attachment. The rear placement of the control valves enables the torch to be used safely for longer periods of time.

The BOC Combi shank is ideal for virtually all industries where a rugged, professional and versatile tool is required – including automotive workshops, general fabrication, shipbuilding and agriculture. The shank can be used with other BOC accessories to cut up to 8" (200mm) and weld up to 3/8" (10mm).

- Used in BOC ProMaster and BOC MasterStart outfits
- Made to EN ISO 5172
- Can be used with acetylene or propane

Compatible Parts:

- BOC hoses
- BOC medium- and heavy-duty acetylene mixers
- BOC medium-duty propane mixers
- BOC Combi cutting attachment

Five-year Conditional Warranty
